Information requested (please be specific): I am requesting digital Geographic Information System (GIS) files delineating elementary, middle and high school attendance boundaries for the 2009-2010 school year for Tulsa, OK School District.

It appears that the digital images (i.e., the PDF files depicting boundaries) were produced with ESRI software and I would like the "shapefile" or "geodatabase" that produced these images. I will also need the coordinate system in which the data reside.

Reason for this request: Academic Research.
